

Dear Mr Hannan,

I have been advised by my professional society (Shiatsu Society UK) of the amendment proposed by Caroline Lucas and Hiltrud Breyer 'A holistic and pluralistic approach to public health is necessary and therefore complementary and alternative medicine should be included in the actions supported the Programme'.

This amendment would support the development of a health care choice that many people wish to make as patients, and many people are increasingly getting involved in as practitioners.

I am writing to ask for your vote for this amendment. Could you let me know if you will back it?

Do feel free to contact me if you would like to discuss this issue.

Very best regards,
